

# UW OSHKOSH

## COLLEGE OF NURSING SIMULATION TRAINING CENTER

### Simulation Training Center:

The College of Nursing Simulation Center has Laerdal, Gaumard and CAE Simulators with capabilities ranging from high fidelity birthing simulators to high fidelity adult trauma simulators. Additionally, we have a state of the art video recording system that has the capability of recording and viewing anywhere to meet all of your learning and training needs.

The College of Nursing has a wide variety of high, medium and low fidelity simulation technology. We will work with any community partner to create a customized training program to meet your special needs.

## Simulation Training Center

### Features:

- Safe learning environment to experience and gain expertise in high-risk, low volume clinical experiences
- State of the art simulation equipment
- Flexible interactive learning spaces
- Expert trainers in a cutting edge, high technology simulated healthcare environment

### Customized Support:

- Scenario building
- Expert trainers
- Simulation technician support
- Mobile simulation capabilities

### Full Body Simulators:

- Meti-Man: Adult (CAE)
- PediaSim: 8 – 10 year old (CAE)
- Lucina: Birthing Simulator (CAE)
- BabySIM (16lb infant) (CAE)
- Simman 3G Adult (Laerdal)
- Baby Hal (Newborn Infant) (Gaumard)
- Noelle: Birthing Simulator (Gaumard)
- +Procedural / Partial Task Trainers

### AV System – LearningSpace (LS)

Capturing video and audio through LS allows for:

- Real time and/or recorded observation and review
- Interactive debriefing experience
- Learner self-reflection and peer review
- Mobile unit that can be brought to your facility

### Benefits:

- Potential decreased medical liability risk
- Team building activities
- Faculty support
- Potential for improved patient outcomes
- Ability to conduct high risk, low incident training
